## TECHNICAL EXPERIENCE

### Projects

- **Fotobomber Photobooth (2017)** – A static website for my photobooth business where previous customers can view their event photos and for potential customers to easily navigate the website to make sure that they get the information needed before booking their event. Fully responsive website. *HTML, CSS, Bootstrap, JQuery/JavaScript*.
- **When In Naga Blog (2017)** – A much more improved version of the *When In Manila* website in terms of interface and user experience. I made this website with pure PHP 7 and MySQL with lots of blog features and added an Admin panel for managing the blog posts and the blog itself. *HTML, CSS, Bootstrap, JQuery/JavaScript/AJAX, PHP, MySQL*.
- **AyosD2 Bets (2017)** – Powered by Laravel Framework and ignited by my passion for coding and my interest in sports betting, I put a lot of effort and time finishing this project with just a limited time of 3 weeks since I want to continue to develop this after I graduated from the bootcamp. *HTML, CSS, Bootstrap, JQuery/JavaScript/AJAX, PHP, MySQL, Laravel*.

## LANGUAGES AND TECHNOLOGIES

- HTML, CSS, Bootstrap, JQuery, JavaScript, AJAX, JSON, PHP, MySQL, Laravel
- Adobe (Photoshop, Premiere, Audition), Sony Vegas Pro, Google SketchUp, Sublime Text 3, GitHub, MS Office
